UniversitätsKlinikum Heidelberg

Neural Therapy

Neural Therapy is the use of local anesthetics in diagnostics and therapy. Perhaps you've heard it referred to as „Quaddel Therapy." You can learn more in Heidelberg to improve theraputic results with cases of chronic pain, infection, and functional difficulties.

Contents: Contents: In our course you will learn all the important injection techniques and practical procedures for use in the clinic or practice.

Objective: The ability to immediatly implement learned techniques in your theraputic practices.

Call for Abstracts

You have the opportunity to present your findings on the results of therapy with local anesthetics in poster form. Original works, casuistry, and descriptions of ongoing research involving neural therapy will all be accepted. Other content on request. The best poster will be presented by the author as part of the main event Friday afternoon.

Rebate Time Table

by 20.1. 2017	**Early booking rebate 15%**
by 17.3. 2017	**Early booking rebate 10 %**
17.3. 2017	Deadline for abstracts
by 5.5. 2017	**Early booking rebate 5%**

22nd - 25th June 2017	**3rd Heidelberg Neural Therapy Meeting 2017**

www.hunter-heidelberg.com

1 Credit = 1 credit hour of 45 min.
Case reports: You can bring cases from your own clinic to discuss and present.

Acknowledgments:

The **DGfAN e.V.** recongnizes in their curriculum all courses (the recognized credits in parenthesis): Basic training: All basic courses (15 Credits per course), internship and exam courses as GK-4 (15 Credits), Masters training: All special courses (10 Credits = Master course).

The **ÖNR**, Wien recognizes all courses for their curriculum (102 Credits).

NATUM e.V.: Recognition for the NATUM-Zertifikat „Holisitc Gynacology."

DGS: Recognition for the supplemental training „Special Pain Therapy", see below.

➡ Call for Abstracts: Poster Exhibition and Presentation

You will have the opportunity to present a poster about research results in therapy with LA to an interested audience. Original papers, case studies and descriptions of ongoing projects in neural therapy will be accepted. Other content available upon request. Present your unpublished data, summaries and clinical experiences to an international group!

The best poster will be presented by its author on Friday afternoon as part of the symposium.
Primary authors of accepted abstracts will receive the reduced attendance fee.

Please send your abstract to:
congress@hunter-heidelberg.com

The deadline is Mo. 15 May 2017.

We look forward to your contributions.

➡ Heidelberg Certificate for Neural Therapy

Exam on June 24/25th, 2017. Prerequisite 55 Credits Courses, see exam courses PK-2 (Inner pages) and **www.hunter-heidelberg.com**.

Invitation

Neural therapy can be used to treat many acute and chronic diseases.

We invite you to join us again in Heidelberg **from June 22-25th 2017,** for the 3rd annual Heidelberg Neural Therapy Meeting.

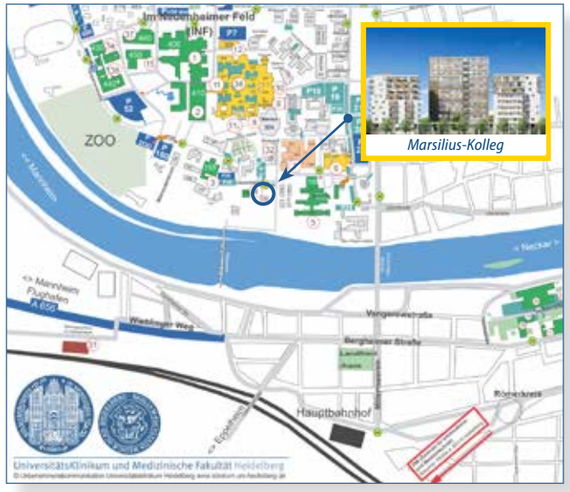
The academic standard of our meeting, the exchange between speakers, physicians and students and the lovely Heidelberg summer, all have, since 2014, been appreciated by our participants.

From research directly to the the doctor's office-Selected experts from the basic sciences, hospitals and practices will present their recent findings.

The „Basic Certificate" from University Heidelberg, in conjunction with DGfAN e.V., cna be immediately aquired.

We're looking forward to seeing you in Heidelberg next June!

Dr. Stefan Weinschenk Prof. Dr. Hubert Bardenheuer



Course Description

*Basics Course GK-1 **(15 Credits)***
Beginner's Course, Basics
Neuraltherapie quick & easy:

How does it work? How do I start next week? With a little bit science and practice, practice, practice under the supervision of experts. Office organization and billing Part 1. Also for therapists who only want to learn to „Quaddel" or perhaps also a bit of trigger-point-therapy?

*Basics Course GK-2 **(15 Credits)***
Intermediate
I know a little, but don't trust myself

A bit of theory regarding the segment on Clinic/office organization and billing, Part 2. Abundant opportunity for practical experience. Also for returning participants.

*Basics Course GK-3 **(15 Credits)***
The Upper Level
Nueral Therapy for Undiagnosed Diseases Cases:

Chronic and undiagnosed diseases. Theoretical basics on the interference field; Practice: Finding and handling the interference field, with many practical exercises. Also for participants who have aquired 30 UE from other sources.

*Training PK-1 **(10 Credits)***
Fallkonferenz mit Patientenvorstellung
Prüfungsvorbereitung

Review of the most important techniques and theory for the exam. Hypothetical situations with the development of a therapy plan, with treatment. Office marketing for experts. Also for participants who only want a refresher, but will not participate in the exam.

*Test PK-2 **(5 Credits)***
Heidelberg Certificate of Neural Therapy
Oral, Practical, Written Exam

Test admission after completing 55 UE. Exam is given in small groups. Results are available on the same day. At the end the exam is reversed, and test takers can ask experts about tips and tricks for in the office.

The presentations are in both German and English.

Special Course SK-1 (10 Credits)
Headaches and Migranes

Multimodal therapy for headaches. Differential diagnostics with help of neural therapy. Simple techniques with high success rates. Therapy for acute seizures and relapse prophylaxis.

*Special Course SK-2 (10 **Credits**) **Gynecology**:*
Abdomial, Lower Back, and Vulval Pain

Multimodal therapy for visceral and urogenital pain, not only for specialists. All new, important techniques. Indications, boundaries, chances, and practical applications. Billing and marketings for specialists. Practical experience on a dummy.

*Special Course SK-3 (10 **Credits**)*
Back Pain-Multimodal Therapy for Musculoskeletal Pain

Indications and limits: acute and chronic back pain. Important injection techniques and useful therapy procedures. Practical experience.

*Special Course SK-4 (10 **Credits**)*
Toothache and Facial Pain-Teeth,
Craniomandibular Disfunction and Neuralgia.

Undiagnosed tooth and face pain is not only distressing for patients. How do I prevent exodontia? Advanced diagnostics for tooth pain and CMD, and acute and chronic facial pain. Important injection techniques and therapy procedures. Practical experience. A course not only for dentists!

*Special Course SK-5 (5 **Credits**)*
Neural Therapy for Acupunture –
The Most Important Techniques.

What you, as an acupunturist, always wanted to know about neural therapy. Advancement of acupunture through neural therapy and the other way around. Practical experience. Also for beginners of acupunture and others who want to broaden their knowledge of the the subject.

Friday 6/23/2017, 2:30-6:30 PM
Scientific Presentations „Neural Therapy and Pain"
Invited and Free Presentations, Poster Session.
