

Technology Offers

- [Hepatitis B virus peptides as vehicles for specific delivery of compounds to the liver \(PDF\)](#)
- [Cardiac Troponin I Sequence Motifs Inducing Myocardial Inflammation and Fibrosis \(PDF\)](#)
- [Safe, easy and reliable anchoring of electrodes to human organs and structures \(PDF\)](#)
- [Quality control test for chondrogenic potency \(PDF\)](#)
- [New method for identifying tissue antigens that cause T-cell responds \(PDF\)](#)
- [Prevention and treatment of pain in diabetes mellitus patients \(PDF\)](#)
- [A new peptide for therapy of cardiac and/or skeletal muscle dysfunction \(PDF\)](#)
- [Immunosuppresiv blood cells to treat multiple sclerosis \(PDF\)](#)
- [Treatment of Monoclonal Gammopathy of Undetermined Significance MGUS \(PDF\)](#)
- [Cutting tool for soft tissue surgery \(PDF\)](#)
- [New Senescence Marker for Cell Culture \(PDF\)](#)
- [Malaria vaccination based on newly isolated antigenic proteins \(PDF\)](#)
- [Vorrichtung zur Entnahme von Nabelschnurblut \(PDF\)](#)
- [Treatment of Cerebral Ischemia \(STROKE\) via GPR109A \(PDF\)](#)
- [Modified AAV9 vectors for endothelial gene transfer \(PDF\)](#)
