

Dental Injury

- What now?

1. Remain calm
2. In case of bleeding or suspicion of injuries to the head area or generally outside the oral cavity: seek medical attention at the trauma surgery department or oral and maxillofacial surgery department
3. Promptly visit a dental office/clinic

Loose or displaced tooth

Keep tooth in place and seek dental practice/clinic

Broken tooth

Find broken tooth fragment and place it in water, seek dental practice/clinic

Knocked-out tooth

Find tooth and place it in a tooth rescue box, alternatively, place it in cold UHT-milk or wrap it in cling film

Immediately seek dental practice/clinic

Do not clean or store the tooth dry!

Tooth rescue box – available at pharmacies or dental offices
