**DKFZ**

Im Neuenheimer Feld 280  
69120 Heidelberg

**Anreise mit dem Auto**

A656 Richtung Heidelberg, weiter auf B37 Richtung Universitätsklinikum/Neuenheimer Feld. Nach Überqueren des Neckars an erster Ampel links in die Jahnstraße, dann rechts in die Straße „Im Neuenheimer Feld“. Zum DKFZ nach ca. 100 Metern links in die Kirschnerstraße, an Leit- und Informationszentrale 2 (LIZ) die Schranke passieren, DKFZ liegt ca. nach 200 m hinter der LIZ auf der re. Seite. Dort wenige Parkplätze, deshalb auf Parkplatz P22 zw. Berliner Straße und Straße „Im Neuenheimer Feld“ parken.

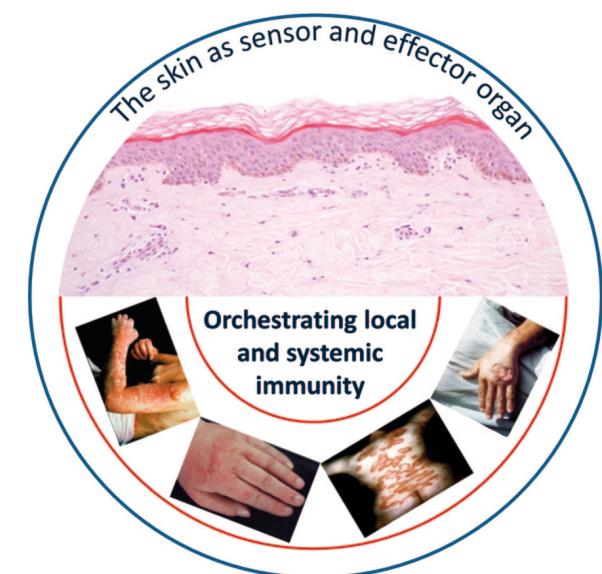

**Anreise mit öffentlichen Verkehrsmitteln**

Straßenbahnlinien 21 und 24:  
Berliner Straße, Haltestelle „Jahnstraße“: Von der Haltestelle zu Fuß auf der Jahnstraße ins Neuenheimer Feld und dann weiter wie unter „Anreise mit dem Auto“ beschrieben (Fußweg ca. 5 Minuten).

Buslinien 31 und 32:  
Haltestelle „Chirurgische Klinik“ oder „Uni-Campus“.

CRC156 DFG  
Dermatology Departments Heidelberg,  
Tübingen and Mainz

Dear colleagues,

It is with special pleasure that on behalf of all members of the combined research grant TR156 I would like to invite you to our 1st Int. Symposium “Frontiers in Skin Immunity” to the beautiful city of Heidelberg. The symposium will take place from June 22-23 2018 and will provide a “state of the art” overview of recent developments in skin immunity. We are fortunate to host this event and have assembled some of the world’s most renowned experts in the field as speakers.

The goal of this symposium is not only to provide an expert overview about the hot topics in skin research, but also to present the work of our TR156 at the end of its first funding period. Therefore an intense poster discussion with all project leaders will be prepared on the first day of the symposium. The TR156 is a world-unique consortium that bundles the research activities of the three universities Heidelberg, Tübingen, and Mainz in skin immunity. Its goal is to provide better insights in the skin immune system in a more “wholistic” approach. Therefore dermatologists, immunologists, microbiologists, and bioinformaticians are working together in this grant to gather a more complete and complex picture of the immune system of the skin and its interactions with systemic immunity. We are very proud that the German funding association (DFG) has granted us with the support necessary to pursue this goal.

Please join us in Heidelberg for this unique event of scientific exchange, fruitful interactions, and networking. Especially young investigators are cordially invited to join us for intense discussions and hopefully new scientific collaborations.

We all hope to see you in Heidelberg in June 2018!

With kind regards,

Prof. Dr. A. Enk  
Speaker of the TR156

## Program

Time: June 22nd, 2018  
Location: DKFZ Communication Center

10.15 h	<b>Welcome</b> Alexander Enk	15.00 Uhr	<b>“Overlapping and distinct activities of IL-36 and IL-1 cytokines in inflammatory and infectious diseases”</b> Manfred Kopf	10.30 h	<b>“Functional characterisation of human B cell antibody responses at single-cell level”</b> Hedda Wardemann
Chairs:	<b>Jörg Köhl and Jean Krutmann</b>	15.30 Uhr	<b>Coffee break</b>	11.00 h	<b>“Peripheral tolerance to desmoglein 3, pemphigus vulgaris antigen”</b> Masa Amagai
10.30 h	<b>“Cutaneous immune responses: revisiting the old concepts”</b> Georg Stingl	16.00 h	<b>“T-Cell metabolism”</b> Erika Pearce	11.30 h	<b>Coffee break</b>
11.00 h	<b>“Enucleation in skin immunity”</b> Ole Sørensen	16.30 h	<b>“Resolving blood and immune cell lineages by endogenous barcoding”</b> Hans-Reimer Rodewald	Chairs:	<b>Martin Röcken and Hansjörg Schild</b>
11.30 h	<b>“Function of the skin microbiome within the immune hologenome”</b> Richard Gallo	17.00 h	<b>“Targeting IL-23 and/or IL-12 in psoriasis: collateral damage through co-targeting”</b> Burkhard Becher	12.00 h	<b>“Coagulation signaling in skin immunity”</b> Wolfram Ruf
12.00 h	<b>“Innate lymphoid cells and skin immunity”</b> Andreas Diefenbach	17.30 h	<b>“Mechanisms of tissue specific monocyte specialization”</b> Andreas Schlitzer	12.30 h	<b>“Regulation of human T cell responses by the microenvironment in health and disease”</b> Christina Zielinski
12.30 h	<b>Lunch</b>	18.00 h	<b>Poster discussion - Drinks and snacks</b>	13.00 h	<b>“The regulation of local immune responses by epithelial and stromal cells”</b> Adrian Hayday
Chairs:	<b>Shinji Shimada and Sabine Eming</b>			13.30 h	<b>Poster discussion and farewell</b>
13.30 h	<b>“Skin immune responses to external stimuli”</b> Kenji Kabashima				
14.00 h	<b>“Regulation of immune homeostasis by dendritic cells”</b> Thomas Brocker				
14.30 h	<b>“Imaging immunity – Developing a spatiotemporal understanding of host defense and immune-related disease”</b> Ronald Germain				

## Program

Time: June 23rd, 2018  
Location: DKFZ Communication Center

Chairs:	<b>Stephan Grabbe and Yvonne Samstag</b>
09.30 h	<b>“Antimicrobial peptides in skin immunity and autoimmunity”</b> Michel Gilliet
10.00 h	<b>“Skin inflammation and microbiota-host immunity controlled by AP-1 transcription factors”</b> Erwin Wagner
