Information Immunohistochemical staining/virtual microscopy

**Tissue Bank of the National
Center for Tumor Diseases
(NCT)**

at the Institute of Pathology
Im Neuenheimer Feld 224
D-69120 Heidelberg

Please consider the following:

1. Establishment of staining protocols and performance of stainings are not considered as standard procedures of the Tissue Bank. Immunohistochemical stainings and virtual microscopy are rather seen as supplemental service within already existing and finalized requests.
2. Project leaders are required to consider the cooperator of the Tissue Bank as coauthor if employees of the Tissue Bank or involved clinical cooperation partners accomplished decisive additional work for the publication.
3. The Tissue Bank evaluates requests regarding additional expenditure, costs and current utilization and reserves to object requests if necessary.
4. The applier needs to pay for material costs incurred during the stainings.
5. Generally, an established and tested staining protocol needs to be provided with this request form.

Prof. Dr. med. Esther Herpel
Head of the Tissue Bank
