FINANCING HEALTH CARE: CONCEPTS, CHALLENGES AND PRACTICES

Content Overview

Health financing systems are critical for reaching universal health coverage. This course provides an overview on the history of health care financing and the basic features of health care financing mechanisms in high-, middle-, and low-income countries. Among others it addresses the universal health coverage in regards to the Migration/Refugee Crisis.

It looks at the positive and normative foundations of health care financing and the features of different health care financing arrangements, e.g. resources collection and risk pooling, benefit package, provider contracting, and quality assurance.

Participants also learn about options and innovations in health care financing and discuss advantages and disadvantages of different systems, such as out-of-pocket systems, tax-based systems, insurance systems, and performance-based financing.

Main Topics

- Health care and health care financing markets
- Features of health care financing arrangements
- Evaluation of health care financing interventions
- Universal Health Coverage and Equity

Target Group

Public health professionals, project planners and managers, paramedical staff, social scientists, tropEd students.

Prerequisites

This course is held in English. Excellent command/high level of proficiency in reading, writing and speaking English is required.

Learning Objectives

By the end of this course participants will be able to:

- Recognise the positive and normative foundations of health care financing, with specific reference to the discourse on health systems reform, universal health coverage and equity
- Differentiate health financing functions and models in any given health system context.
- Compare and analyse the basic features of health care financing mechanisms in high-, middle-, and low-income countries, including situations pertaining to migrant and refugee crises
- Critically appraise the roles of the public and private sector in health care financing in different contexts
- Differentiate the tools used in the development and assessment of financing mechanisms and evaluate their strengths and weaknesses
- Compare and appraise the value of alternative viable health financing options to answer health system challenges in their respective countries

Teaching and Assessment

This course combines interactive lectures, facilitated group work, and self-study to expose participants to both theory and practice of health care financing. Group work comprises structured exercises set around specific case studies and participant-initiated reflections on the peculiarities of health care financing in their country of origin.

Course participants are expected to attend teaching sessions full-time, participate regularly in discussions and group work.

Participants will also be assessed on:

- Group work and presentation (50%)
- Written exam, short fact and essay questions (50%)

SHORT COURSES IN INTERNATIONAL HEALTH / tropEd

The short courses programme offered by the Heidelberg Institute of Global Health at Heidelberg University provides opportunities for continuing education and professional development. Short courses are open to the Institute's postgraduate students, students from other tropEd member institutions, and health professionals wanting to specialise or expand their knowledge in a particular subject area in international health. The Heidelberg Institute of Global Health offers one- and two-week intensive courses, requiring full-time attendance from Mondays to Fridays, 9am - 5pm. Short courses offered at the Heidelberg Institute of Global Health are tropEd accredited.

tropEd is an international network of institutions for higher education in international health. It collaborates closely with institutions in Africa, Asia and Latin America. tropEd provides postgraduate opportunities for education and training contributing to sustainable development.
