IMPROVING THE QUALITY OF HEALTH CARE SERVICES IN RESOURCE LIMITED SETTINGS

Content Overview

This course focuses on practical tools and methods to improve healthcare services in low- and middle-income countries. It introduces participants to major steps and trends in healthcare quality and patient safety movements with a focus on challenges to improving quality in resource-limited settings.

Course participants learn how to adapt quality improvement tools, methods, and techniques to national and local settings with a special emphasis on managing and motivating people and designing sustainable health improvement programmes.

A two-day skills development workshop strengthens individual and team skills in evaluating the quality of health care services.

Main Topics

- Healthcare and health services quality improvement principles
- Evaluation of health services quality
- Designing sustainable health improvement programmes in resource-limited settings
- Current quality improvement trends in global health

Target Group

Public health professionals, quality managers, project planners and managers, medical and paramedical staff, social scientists, tropEd students, global health consultants, Ministries of Health, development partners.

Prerequisites

This course is held in English. Excellent command/ high level of proficiency in reading, writing and speaking English is required.

Learning Objectives

- By the end of this course participants will be able to:
- Defend the importance of improving quality in health services
 - Describe common mechanisms to improve quality of health services in resource limited settings
 - Critically analyze the use of quality improvement principles and mechanisms in resource limited settings
 - Describe current human and other resource challenges to improve health service qualityDemonstrate individual and team skills in using quality improvement tools and mechanisms

Teaching and Assessment

This course uses case studies and experience from middle- and low-income countries, individual and group activities and presentations. Each session has a specific topic and key readings. Participants will work individually and in groups of max. 4-6 participants per case.

Course participants are expected to attend teaching sessions full-time and actively participate in class discussions and group work.

- Participants' achievement of the learning objectives will be assessed on:
- Individual written assignment based on case studies from low-and middle-income countries (60%)
 - Presentation of a group project (40%)

SHORT COURSES IN INTERNATIONAL HEALTH / tropEd

The short courses programme offered by the Heidelberg Institute of Global Health at Heidelberg University provides opportunities for continuing education and professional development. Short courses are open to the Institute's postgraduate students, students from other tropEd member institutions, and health professionals wanting to specialise or expand their knowledge in a particular subject area in international health.

The Heidelberg Institute of Global Health offers one- and two-week intensive courses, requiring full-time attendance from Mondays to Fridays, 9am - 5pm. Short courses offered at the Heidelberg Institute of Global Health are tropEd accredited.

tropEd is an international network of institutions for higher education in international health. It collaborates closely with institutions in Africa, Asia and Latin America. tropEd provides postgraduate opportunities for education and training contributing to sustainable development. ■ www.troped.org
