The Institute of Immunology

Master thesis position

The role of the innate immune system in cancer immunology and adaptive immune system initiation

We are looking for a student (f/m/d) aiming for a master thesis project in the field of innate immunity and cancer immunology. Our project is highly innovative and aiming to develop new strategies to target immunologically cold tumours. If you are motivated to join the quest – apply!

Methods:

PCR/qPCR, fluorescence microscopy, enzyme activity assays, cell culture, FACS, ELISA, ...
