

Dienstags-Diskussions-Runde

Wintersemester 2021/22

Die Veranstaltungen finden jeweils dienstags, 12.30 Uhr über HeiConf statt.

Vorträge

- | | |
|----------|--|
| 19.10.21 | Manuel Feißt (IMBI)
The Comprehensive Complication Index (CCI) – statistical considerations |
| 09.11.21 | Sinclair Awounvo (IMBI)
Deriving percentiles curves using GAMLSS with repeated measurements |
| 23.11.21 | Präsentationen von Masterarbeiten MSc Medical Biometry/Biostatistics |
| 30.11.21 | Felix Boekstegers (IMBI)
Risk Factors for Gallbladder Cancer and Dysplasia in South American Gallstone Patients |
| 07.12.21 | Alice Blandino (IMBI)
Identification of circulating lncRNAs associated with gallbladder cancer risk by tissue-based preselection, cis-eQTL validation, and analysis of association with genotype-based serum expression |
| 14.12.21 | Präsentationen von Masterarbeiten MSc Medical Biometry/Biostatistics |
| 21.12.21 | Valentina Gárate (IMBI)
Mutation and mutational profiles of gallbladder cancer worldwide |
| 11.01.22 | Lukas Baumann & Rouven Behnisch (IMBI)
Some Issues Concerning Randomisation |
| 18.01.22 | Tim Osburg
Applied methodology in a genome-wide association study of Alzheimer correlated phenotypes |
| 25.01.22 | Präsentationen von Masterarbeiten MSc Medical Biometry/Biostatistics |
| 01.02.22 | Christopher Büsch (IMBI)
Additional benefit assessment methods: Is the point estimate of ASCO's method a valid alternative? |
| 08.02.22 | Meinhard Kieser (IMBI)
Datengesteuerte Adjustierung bei Baseline-Inbalancen: Was ist sinnvoll und möglich? |
