

Dienstags-Diskussions-Runde

Sommersemester 2022

Die Veranstaltungen finden jeweils dienstags, 12.30 Uhr über HeiConf statt.

Vorträge

- | | |
|----------|---|
| 26.04.22 | Alexander Ritz (IMBI)
The Modelling of Heavy Tails with Deep Transformation Models |
| 10.05.22 | Präsentation von Masterarbeiten MSc Medical Biometry/Biostatistics |
| 17.05.22 | Linda Zollner (IMBI)
Mendelian randomization on the association of Native American ancestry and breast cancer in Colombian and Mexican women |
| 07.06.22 | Jan Meis (IMBI)
Performance of different estimators in adaptive two-stage trials with optimized design parameters |
| 14.06.22 | Samuel Kilian (IMBI)
Developing a survival prediction model |
| 21.06.22 | Lukas D. Sauer (IMBI)
Geometric methods in statistics: An invitation to information geometry? |
| 28.06.22 | Rouven Behnisch (IMBI)
Dealing with delayed treatment effects: a comprehensive comparison of possible methods |
| 05.07.22 | Christopher Büsch (IMBI)
Additional benefit assessment methods: Is the point estimate of ASCO's method a valid alternative? |
| 12.07.22 | Marietta Kirchner, Rouven Behnisch (IMBI)
Group-Based Trajectory Modeling (GBTM) – Application with PROC TRAJ (SAS macro). |
| 19.07.22 | Carol Barahona Ponce (IMBI)
Arsenic and Gallbladder Cancer Risk in Europeans and Chileans |
| 26.07.22 | Felix Boekstegers (IMBI)
Identification of Circulating Metabolites Causally Linked to the Risk of Gallbladder Cancer |
| 02.08.22 | Samuel Zimmermann, Johannes Vey (IMBI)
Text classification to automate literature search using machine learning |
