Place: Analysezentrum 3, 2. OG, Room 02.332
Date: Tuesday, October 16th
Time: 11.00 am

mRNA methylation and processing in cardiac remodeling

The post-transcriptional mechanisms controlling homeostasis and stress responses in the heart are still largely unknown. My work aims at dissecting the regulatory role of mRNA processing and modifications in the context of cardiac remodeling.

Host: **Prof. Dr. med. Johannes Backs**
Director of the Department Molecular Cardiology and Epigenetics
Department of Internal Medicine VIII
University of Heidelberg
