

HEIDELBERG UNIVERSITY HOSPITAL

Heidelberg University Hospital | Neurosurgery | INF 400 | 69120 Heidelberg

Prof. Dr. Andreas Unterberg

Director and Chairman
Department of Neurosurgery

Dear patient,

the following paper provides some important information on our private patients outpatient clinic.

- You are invited 30 minutes before the scheduled time for your visit for the following reason: Your CT or MRI scans have to be uploaded into our computer system from the neuroradiology colleagues. We ask for your patience because this procedure may take some time due to the technical procedure. Please ensure, that the scans are not older than three months.

- The order of access is at the discretion of the physician. In some cases, the order of access for the examination may differ from the time of appearance in the outpatient clinic.

- You will have a preliminary examination before meeting Professor Unterberg. After this examination you may have to wait for some more minutes before entering the room for Professor Unterberg's final evaluation.

- If you are coming for a follow-up visit, you are examined by a neurosurgical consultant. You might not see Professor Unterberg. Of course he will be consulted, if necessary.
