

Date	Speaker	Topic
29. January 2018	Dr. A. Saborowski <i>Gastroenterology</i> MHH Hannover	Cancer cell-derived stroma-modulating factors in cholangiocarcinoma
22. January 2018	Dr. J. Verheij <i>Department of Pathology</i> Amsterdam	Molecular perspectives on pancreatic and bile duct cancer; where are we and where do we have to go?
15. January 2018	Dr. M. Herfs <i>Lab of Experimental Pathology</i> GIGA-Cancer University of Liege, Belgium	HPV infection in mucosal junctions: a novel paradigm but several unresolved issues
27. November.2017	Prof. Dr. J. Haybäck <i>Institute of Pathology</i> Medical University Graz	Role of eukaryotic initiation factors (eIFs) in tumor onset and progression
13. November 2017	Prof. Dr. J. McKeating <i>Institute of Immunology and Immunotherapy</i> University Birmingham, Oxford	Hypoxia inducible factors - a new player in viral hepatitis and liver pathogenesis
10. July 2017	Prof. M. S. Tsao <i>Dept. of Pathology Princess Margaret Cancer Centre, Ontario Cancer Institute, Toronto</i>	Characterization and validation of lung cancer xenografts
26. June 2017	Prof. Dr. J. Hengstler <i>Leibniz-Institut für Arbeitsforschung</i> Dortmund	Two-photon based functional imaging of the liver
06. February 2017	Dr. T. Eggert <i>Dept of Gastroenterology, Hepatology and Endocrinology</i> MHH Hannover	Senescence-associated myeloid cell responses in liver tumor surveillance and tumor progression
16. January 2017	Prof. Dr. T. Lüdde <i>Klinik für Gastroenterologie, Stoffwechselerkrankungen und Internistische Intensivmedizin</i> Uniklinikum Aachen	Programmed Cell-death pathways in chronic liver injury and HCC development
25. November 2016	Festveranstaltung 150 Jahre Pathologie Heidelberg	Zukunft der Medizin – seit 150 Jahren
24. October 2016	Prof. Dr. M. Hummel <i>Charité, Berlin</i>	Wandel in der Morphologie Von der Betrachtung des Einzelfalls zur epidemiologischen Größe – Aufbau und Werden der Biobanken
17. Juli 2016	Prof. Dr. M. Manns MHH Hannover	Hepatitis C: From non-existence to epidemic and healing
05. Juli 2016	PD Dr. P. Osten Berlin	Pathologie im Krieg
20. Juni 2016	Prof. Dr. C. Hopf <i>Applied Research Center Biomedical Mass Spectrometry ABIMAS</i> Hochschule Mannheim	Mass spectrometry imaging - from preclinical pharmaceutical research to ePathology
06. Juni 2016	Prof. Dr. W. Eckart Heidelberg	Pathologie im Nationalsozialismus Die Rolle der Heidelberger Pathologie

		unter Alexander Schmincke
23. Mai 2016	<i>Prof. Dr. J. T. Schnalke Berlin</i>	Wandel in der Pathologie Von der morphologisch-diagnostischen Betrachtung zur prognostisch- therapeutischen Entscheidungsfindung
25. April 2016	<i>Prof. Dr. J. Kirsch Heidelberg</i>	Wie der Vater so der Sohn Entstehung der Heidelberger Pathologie unter den Arnolds
14. December 2015	<i>Dr. M. S. Matter Institute of Pathology University Hospital Basel</i>	The role of the inflammatory microenvironment in liver cancer
30. November 2015	<i>Dr. J. Marquardt Medical Center University Mainz</i>	Dissecting molecular Hepatocarcinogenesis: from sequential evolution to novel therapeutic models
16. November 2015	<i>Prof. Dr. B. Schäfer Experimental Infectious Diseases & Cancer Research University of Zurich</i>	New molecular and cell biological findings in rhabdomyosarcoma
20. July 2015	<i>Dr. U. Kossatz-Böhlert Klinischen Pharmakologie Uniklinikum Tübingen</i>	Phenotypical and functional characterization of hepatic tumor initiating cells
13. July 2015	<i>Prof. Dr. A. Nordheim Molecular Biology Interfaculty Institute for Cell Biology, University Tübingen</i>	The transgenic SRF-VP16 mouse model of liver tumor progression
15. June 2015	<i>Prof. Dr. S. Smola Institut für Virologie Universitätsklinikum des Saarlandes</i>	Determinants of immunogenicity in cervical cancer
05. May 2015	<i>Prof. Dr. C. Rössig Westfälische Wilhelms-University, Münster</i>	CAR T cell targeting of childhood tumors
27. April. 2015	<i>Prof. Dr. A. Paschen Dermatology, University Hospital Essen</i>	T cell driven clonal selection of low immunogenic melanoma
02. February 2015	<i>Dr. M. Beck Structural and Computational Biology, EMBL Heidelberg</i>	Cell-type specific nuclear pores: how the nuclear transport system is fine-tuned towards context-specific needs
26. January 2015	<i>Prof. Dr. M. Mann Dept. Proteomics and Signal Transduction MPI of Biochemistry Martinsried</i>	High resolution mass spectrometry for clinical proteomics.
17. November 2014	<i>Prof. Dr. R. O'Connor, Dept of Biochemistry, University of Cork Ireland</i>	The Insulin-IGF system: At the nexus of Diabetes and diseases of ageing: Cancer and Alzheimer's Disease
03. November 2014	<i>Prof. Dr. T. Wirth Institute of Physiological Chemistry University Ulm</i>	NF-kB/MYC/FOXO1- Biology and Pathology
20. October 2014	<i>Dr. N. Woller Gastroenterology MHH Hannover</i>	Virotherapy overcomes tumor resistance to PD-1-immunotherapy by broad mutanome-directed T cell responses in

		mice
14. July 2014	<i>Prof. Dr. T. Brabletz University Medical Center Freiburg</i>	EMT, microRNAs and Cancer Stem Cells
30. June 2014	<i>Prof. R. Plenz Hepato-, Gastroentero-& Infektiologie Uniklinikum Tübingen</i>	Targeting c-Met in cholangiocarcinoma
2. June 2014	<i>Dr. T. Grünwald INSERM Paris</i>	Characterization of the chr10 Ewing's sarcoma susceptibility locus
19. May 2014	<i>Prof. Dr. U. Lauer Hepato-, Gastroentero-& Infektiologie Uniklinikum Tübingen</i>	Virotherapy of hepatobiliary and gastrointestinal tumors: current stage in preclinical and clinical research
5. May 2014	<i>PD Dr. Frederick Klauschen Institute of Pathology Charité Berlin</i>	Integrative genomic and proteomic analyses in personalized medicine
27. January 2014	<i>Prof. Dr. S.Rose-John Institute of Biochemistry, University Kiel</i>	The Role of Interleukin-6 and ADAM17 in Inflammation and Cancer
1. July 2013	<i>Prof. Dr. Mathias Heikenwälder Institute of Virology, TU Munich</i>	Understanding the mechanisms of hepatocellular carcinoma development: from inflammation to dietary exposure.
29. April 2013	<i>PD Dr. Ingo Nindl Hauttumor Center Charite Berlin</i>	The role of HPV and skin cancer
15. April 2013	<i>Prof. Dr. Albert Becker Clinic for Neuropathology Bonn</i>	Molecular neuropathology of epilepsy-associated focal malformations and tumors - recent developments of animal models
04. February 2013	<i>Prof. Dr. Yann Barrandon University Hospital Lausanne</i>	Plasticity of Epithelial Stem Cells
28. January 2013	<i>Dr. Thomas Pietschmann, Gastroenterology MHH Hannover</i>	Pathways and barriers of hepatitis C virus replication
17. December 2012	<i>PD Dr. Annette Paschen Clinic for Dermatology Essen</i>	Barriers to an effective T cell recognition of malignant melanoma
03. December 2012	<i>Prof. Dr. Sven Perner Institute of Pathology Uniklinikum Bonn</i>	From Translational Lung Cancer Research to Translational Research of other Organs Sites
26. November 2012	<i>Prof. Dr. Albert Becker Clinic for Neuropathology Bonn</i>	Molecular neuropathology of epilepsy-associated focal malformations and tumors - recent developments of animal models
30. July 2012	<i>Thomas Wirth, MHH Hannover</i>	Microsphere-based vaccination strategies for immunotherapy of HCC"
18. June 2012	<i>Prof. Luigi Terracciano Molecular Pathology University Hospital, Basel</i>	Hepatocellular nodular lesions : not all nodules are created equal"

30. January 2012	<i>Prof. Dr. H. Bastians Molecular Oncology University Hospital UMG, Göttingen</i>	CIN-ful cancer: the molecular mechanisms of chromosomal instability in human cancer"
16. January 2012	<i>PD Dr. M. Zörnig Institute for medical research Frankfurt</i>	The role of Fuse Binding Protein 1 (FBP1) in hematopoiesis and tumor development"
19. December 2011	<i>PD Dr. J. Herkel Department of Medicine University Medical Centre Hamburg-Eppendorf,</i>	Learning from the liver: immune regulation, Treg and treatment for autoimmune neuroinflammation"
05. December 2011	<i>Dr. Diego Calvisi Institute of Pathology University Greifswald</i>	AKT is oncogenic in the liver and functionally interacts with the Ras pathway in hepatocellular carcinoma: possible therapeutic implications"
21. November 2011	<i>Prof. Dr. H. Bantel Dept. of Gastroenterology, Hepatology & Endocrinology, MHH Hannover</i>	Apoptosis in liver diseases"
07. November 2011	<i>Prof. Dr. S. Duensing Department of Urology University hospital Heidelberg</i>	Genomic instability and cancer - basic mechanisms and translational aspects"
25. July 2011	<i>Prof. Dr. J. Klussmann Otolaryngology University Hospital Giessen</i>	The clinical relevance of Papilloma virus in the emergence of Oropharynxcarcinoma"
04. July 2011	<i>Prof. Dr. M. Eilers Institute of Physiological Chemistry University Würzburg</i>	Integration of cell growth and cell metabolism by myc"
27. June 2011	<i>Prof. Dr. N. Malek Institute for Molecular Biology, MHH Hannover</i>	Regulation of centrosome duplication by ubiquitylation processes"
06. June 2011	<i>Dr. R. Geffers Array Facility Helmholtz Centre for Infection Research Braunschweig</i>	Microarray- & deep sequencing-based profiling approaches: a technological evolution in expression-, genomic-, and epigenetic-profiling illustrated by real-life examples"
30. May 2011	<i>PD Dr. R. Thomas Functional Cancer Genomics MPI Cologne</i>	Lung Cancer Genomics
16. May 2011	<i>Prof. Dr. J. Rommelaere Dept. of Tumor Virology DKFZ and INSERM France</i>	Parvovirus as oncolytic principal in cancer treatment"
26. 07. 2010	<i>Prof. Dr. H. Bantel Klinik für Gastroenterologie, Hepatologie und Endokrinologie MHH Hannover</i>	Cell Death Biomarkers in Liver Diseases"
12. 07. 2010	<i>Prof. Dr. J. Zucman-Rossi Laboratoire de genetique des tumeurs, INSERM U434 and CEPH/ Fondation Jean Dausset, Paris</i>	Molecular classification of benign and malignant hepatocellular tumors"
28. 06.2010	<i>Dr. A. Vogel Klinik für Gastroenterologie, Hepatologie und Endokrinologie MHH Hannover</i>	Dissecting the role of p21 in hepatocarcinogenesis

21. 06. 2010	<i>Prof. Dr. E. Jäger Hämatologie - Onkologie Krankenhaus Nordwest, Frankfurt</i>	Cancer Immunotherapy, basic concepts and clinical trials"
17.05. 2010	<i>Prof. Dr. B. Clement INSERM, U620, Université de Rennes</i>	Extracellular matrix remodelling modulates the Wnt/b-catenin cell signaling pathway in hepatocellular carcinomas
19. 04.2010	<i>Prof. Dr. M. Prinz Abt. für Neuropathologie Universität Freiburg</i>	News about innate immune system in the brain during disease"
15. February 2010	<i>Prof. N. Hoogerbrugge Hereditary Cancer Clinic Radboud University Medical Center, Nijmegen, Holland</i>	Hereditary colorectal cancer: mismatch repair deficiency for recognition of cases and detection of new causes
01. February 2010	<i>Prof. G. Sauter Department of Pathology University Medical Center Hamburg-Eppendorf, Germany</i>	Molecular pathology of prostate carcinoma: answers to the most important questions
18. Jan. 2010	<i>Prof. T. Corfield Clinical Science at South Bristol Bristol Royal Infirmary, England</i>	Glycogenes mediate the development of colorectal cancer
14. Dez. 2009	<i>Prof. S. Werner Institute of Cell Biology ETH Zürich, Switzerland</i>	Stromal-epithelial interactions in tissue repair and cancer
23. Nov. 2009	<i>Prof. R. O'Connor Department of Biochemistry University College Cork, Ireland</i>	New mediators of metabolic signalling in cancer cells
16. Nov. 2009	<i>Prof. W. Brück Department of Neuropathology, University Medical Center Göttingen</i>	New insights in immunotherapy of multiple sclerosis
20.7.09	<i>H. Will Heinrich-Pette Institute University of Hamburg</i>	SPOC1 is essential for germinal stem cell maintenance and plays an important role in chromosome condensation and segregation
6.7.09	<i>K. Streetz Department of Medicine III University-Hospital Aachen</i>	The role of HGF/c-Met for hepatocellular protection in mice
22.6.09	<i>W. Brück Department of Neuropathology, University Medical Center Göttingen</i>	New insights in immunotherapy of multiple sclerosis
8.6.09	<i>S. Riethdorf Institut für Tumorbiologie Universitätsklinikum Hamburg-Eppendorf</i>	Detection and characterization of circulating tumor cells in cancer patients
11.5.09	<i>N. Galjart Department of Immunology, Erasmus MC, Rotterdam, Netherland</i>	Role of the transcription regulator CTCF in cellular biology and T cell development
2.2.09	<i>M. Pasparakis Institute for Genetics University of Cologne</i>	IKK/NF-kappaB Signaling in Inflammation and Cancer

26.1.09	<i>H. Robenek Leibniz-Institut für Arterioskleroseforschung Universität Münster</i>	Compartmentalization of Lipid Droplet Biogenesis and Secretion
19.1.09	<i>J.M. Coindre Department of Pathology, Institut Bergonié, Bordeaux (France)</i>	Molecular Classification of Sarcomas
15.12.08	<i>A. Hombach Department of Internal Medicine, Tumor Genetics, and Center for Molecular Medicine Cologne (CMMC), University of Cologne</i>	Modulating a specific Immune Response by recombinant T Cell Receptors
1.12.08	<i>K.H. Plate Neurologisches Institut Klinikum der Johann Wolfgang Goethe-Universität</i>	Mechanisms of Angiogenesis in malignant Gliomas
3.11.08	<i>S. Diederichs Joint Research Group Molecular RNA Biology & Cancer DKFZ & Institute of Pathology, University of Heidelberg</i>	microRNA Biology, RNAi, and Cancer
28.7.08	<i>A.W. Lohse I. Department of Medicine, University Medical Centre Hamburg- Eppendorf, Hamburg</i>	Making and Breaking of Tolerance in the liver
21.7.08	<i>H. J. Garchon Cochin Institute and INSERM Department of Immunology Laboratory of Chronic Inflammation, Paris</i>	Making and Breaking of Tolerance in the human Thymus: a genetic approach using autoimmune myasthenia gravis
14.7.08	<i>S. Kubicka Dept. of Gastroenterology, Hepatology, and Endocrinology, MH Hannover</i>	Virotherapy of Cancer
7.7.08	<i>G. Superti-Furga CeMM Center for Molecular Medicine of the Austrian Academy of Sciences, Vienna</i>	Molecular networks for a postgenomic pharmacology
30.6.08	<i>G. Reifenberger Dept. of Neuropathology, Heinrich- Heine-University, Düsseldorf</i>	Molecular genetics of gliomas: Recent developments and clinical implications
16.6.08	<i>A. Perren Dept. of Pathology, Klinikum rechts der Isar, TU Munich</i>	The origin of endocrine pancreatic tumors – from histogenesis to tumor stem cells
28.1.08	<i>J.R. Couchman Danish National Research Foundation, Biomedicine Institute, University of Copenhagen (Denmark)</i>	Cell surface proteoglycans: regulators of integrin-mediated adhesion, migration, and matrix assembly
14.1.08	<i>C. Niemann Center for Molecular Medicine Cologne University Hospital Cologne</i>	Beta-catenin/Lef1 signalling in mammalian skin development, differentiation and epidermal tumour formation

17.12.07	<i>R. O'Connor Department of Biochemistry University College Cork (Ireland)</i>	IGF-I and adhesion signalling in cancer cells
3.12.07	<i>H. Kalthoff Klinik für Allgemeine Chirurgie und Thoraxchirurgie Universitätsklinikum Kiel</i>	Conversion of death receptor signalling into cancer progression
19.11.07	<i>P.A. Knolle Institute of Molecular Medicine and Experimental Immunology University Hospital Bonn</i>	Steps and stops on the way to tolerance in the liver
9.11.07	<i>S.H. Caldwell Gastroenterology and Hepatology University of Virginia Charlottesville, VA (USA)</i>	Pathogenetic Analyses of nonalcoholic Steatohepatitis
22.10.07	<i>V. Cerundolo Weatherall Institute of Molecular Medicine, University of Oxford (GB)</i>	Harnessing invariant NKT cells in cancer vaccines
23.7.07	<i>M. Pontoglio Centre National de la Recherche Scientifique (CNRS), Paris (France)</i>	HNF1β in nephrogenesis and tubular planar cell polarization
18.6.07	<i>J. Behrens Nikolaus-Fiebiger-Zentrum Universität Erlangen/Nürnberg</i>	Wnt signaling and chromosomal instability
16.6.07 2.7.07	<i>P. Peterson Department of Molecular Pathology, University of Tartu U. Protzer Forschergruppe Molekulare Infektiologie, Köln</i>	The role of AIRE in central immunologic tolerance Cell-autonomous control of hepatitis B virus
21.5.07	<i>M. Bader Max-Delbrück-Centrum für Molekulare Medizin, Berlin-Buch</i>	Serotonin: more than a neurotransmitter
19.2.07	<i>R. Bargou Department of Internal Medicine II, Division of Hematology and Oncology, Würzburg University</i>	Oncogenic signaling pathways in multiple myeloma: identification of therapeutic targets
5.2.07	<i>G. Walz Innere Medizin IV Medizinische Universitätsklinik Freiburg</i>	Pathogenetic mechanisms of renal cystic diseases
29.1.07	<i>A. Kaufmann Klinik für Gynäkologie & Hochschulambulanz Charité, Berlin</i>	Immunoresponse and immunotherapy in cervix carcinoma
22.1.07	<i>L. Zender Cold Spring Harbor Laboratory, New York (USA)</i>	Integrative Genomic Approaches for Cancer Gene Discovery in Hepatocellular Carcinoma
15.1.07	<i>M. Dietel Institute of Pathology, Charité, Berlin</i>	Gewebekunden als Voraussetzung für Innovationen in der Targeted Therapy

18.12.06	<i>C. Trautwein Department of Medicine III, University Hospital RWTH Aachen</i>	Relevance of NF-kB-dependent mechanisms during liver injury
11.12.06	<i>G. Gianelli Dept. of Internal Medicine University of Bari Medical School (Italy)</i>	Cancer-host-interaction in the progression of hepatocellular carcinoma
20.11.06	<i>B. Moser Theodor-Kocher Institute University of Bern (Switzerland)</i>	Cellular immune surveillance in human skin
19.10.06	<i>M. Arbyn Scientific Institut of Public Health, Brüssel</i>	The role of molecular markers in detection and management of cervical cancer precursors
31.7.06	<i>C. Poremba Institute of Pathology University of Düsseldorf</i>	ErbB tyrosine kinase-receptors in sarcomas
24.7.06	<i>P. Bork Structural and Computational Biology Unit, EMBL Heidelberg</i>	Predicting biological function at different scales
10.7.06	<i>F. Platt The Oxford Glycobiology Institute, Department of Biochemistry, University of Oxford (GB)</i>	The immunological consequences of the storage of glycosphingolipids in the lysosome.
26.6.06	<i>J. Petersen Clinic for Gastroenterology Hepatology and for Infectious Diseases, University Hospital Eppendorf, Hamburg</i>	Liver regeneration and HBV/HCV infection in uPA-mice
12.6.06	<i>H.J. Gabius Institut für Physiologische Chemie Ludwig-Maximilian-Universität, München</i>	The sweet side of p16
22.5.06	<i>T. Brabetz Institute of Pathology, University of Erlangen/Nürnberg</i>	Malignant progression in colorectal cancer: EMT, stem cells and beta-catenin
15.5.06	<i>P. Saftig Institute of Biochemistry, University of Kiel</i>	Lysosomes in autophagy and phagocytosis: Lessons from knockout mouse studies
6.2.06	<i>R. Hamelin INSERM, Paris (France)</i>	The molecular pathogenesis of microsatellite instable cancers
30.1.06	<i>A. Hüttenhofer Biozentrum Med. Universität Innsbruck (Austria)</i>	Non-protein coding RNAs: hope versus hype
16.1.06	<i>U. Schaible Max-Planck-Institut für Infektionsbiologie, Charité, Berlin</i>	Tuberculosis: lipids in virulence and immunity
5.12.05	<i>H.A. Lehr Institute of Pathology, University of Lausanne (Switzerland)</i>	Impact of optical illusions on grading of prostate cancer
21.11.05	<i>N.P. Malek Gastroenterologie, Hepatologie &</i>	Control of cell cycle progression and tissue homeostasis by p27 and Cyclin E

	<i>Endokrinologie, MH Hannover</i>	
7.11.05	<i>J. Brüning Institut für Genetik, Universität Köln</i>	Genetic analysis of insulin action
11.7.05	<i>A. Rosenwald Institut für Pathologie, Universität Würzburg</i>	Gene expression profiling for diagnosis and prognosis of lymphoma
27.6.05	<i>C. Brakebusch Max-Planck Institut für Biochemie Martinsried</i>	Analysis of RhoH function in vivo
13.6.05	<i>M. Neurath I. Medizinische Klinik und Poliklinik Universität Mainz</i>	Immunopathogenesis and endomicroscopy of colorectal carcinomas
30.5.05	<i>P. Baeuerle Micromet AG, München</i>	Antibodies in the treatment of malignant diseases
9.5.05	<i>M. Blessing Biotechnologisch-Biomedizinisches Zentrum Veterinärmedizinische Fakultät Universität Leipzig</i>	TGF-beta and immune regulation
2.05.05	<i>E. Roeb Medizinische Klinik III, RWTH Aachen</i>	Matrix metalloproteinases and their inhibitors: structure, function, and therapeutic aspects
28.2.05	<i>S. Rose-John Biochemisches Institut Universität Schleswig-Holstein (Kiel)</i>	Soluble cytokine receptors in the control of inflammation
21.2.05	<i>B. Schlegelberger Institut für Zell- und Molekularpathologie, MH Hannover</i>	Erblicher Brust- und Eierstockkrebs eine gemeinsame Herausforderung für Humangenetiker und Pathologen
31.1.05	<i>A. Weber Institut für Pathologie, Universität Mainz</i>	Transkriptionelle Regulation des c-myc Onkogens
17.1.05	<i>C. Niessen Nachwuchsgruppe I des Zentrums für Molekulare Medizin Köln (ZMMK) Universität zu Köln</i>	How to contact your neighbouring cells: the role of cadherins
6.12.04	<i>M.L. Hansmann Institut für Pathologie, Universität Frankfurt am Main</i>	Neue molekularbiologische Ergebnisse in der Lymphknotenpathologie
22.11.04	<i>L. Rudolph Klinik für Gastroenterologie, Hepatologie u. Endokrinologie MH Hannover</i>	Senescence and DNA-damage during regeneration and cancer
