

Faculty

Prof. Martina Muckenthaler, PhD

Research Interests

Iron metabolism

Immunity

Rare anemias

microRNAs / mRNA expression

Short CV

Affiliation

Martina Muckenthaler
Professor of Molecular Medicine
University of Heidelberg, Department of Paediatric Oncology, Haematology and Immunology
Head of Molecular Medicine
Molecular Medicine Partnership Unit Group Leader
Translational Lung Research Center (TLRC) Member

University of Heidelberg
Im Neuenheimer Feld 350
69120 Heidelberg
Phone:+49 6221 56-6923
email: martina.muckenthaler@med.uni-heidelberg.de

Curriculum Vitae

1984 –	Study of Biology at the University of Regensburg and the Technical University of Munich
1989	London Hospital Medical College, London, Great Britain (MSc project)
1990	PhD at the University of Oxford, Great Britain
1994	Johann Wolfgang Goethe University Frankfurt (PhD defense)
1994 –	Postdoctoral Fellow, EMBL, Heidelberg
2001	
2002 –	Staff Scientist, EMBL, Heidelberg
2003	
2004	Professor of Molecular Medicine
2005	Head of the post-doctoral excellence program of the Medical Faculty of Heidelberg
2006	Group Leader, University of Heidelberg / EMBL Molecular Medicine Partnership Unit (MMPU)
2008	Equal opportunity representative of the University of Heidelberg
2009	Director of the Bioiron society
2010	Group Leader Cell Network Excellence Cluster

Honours & Awards

- 1994 EMBO longterm fellowship
2000 Fondbroker Förderpreis "The best idea" (2000)
2007 Margrit Krikker Award 2007 by the International Bioiron Society in Kyoto
2005 Member of the editorial board of the Journal of Molecular medicine and Biochemical Journal
2009 elected director of the Bioiron society
2012 Committee Member of the European Hematology Association (EHA)
2012 Scientific Committee on Iron and Heme of the American Society of Hematology (ASH)

Projects

My research focuses on iron metabolism and its disturbances in human disease. My major aim is to understand the regulatory circuitry underlying systemic iron homeostasis. We concentrate on the iron

hormone hepcidin and its regulatory “target receptor” ferroportin. Since both the excess of hepcidin (leading to anemia) and its deficiency (causing iron overload) must be prevented, a central goal of our work is to decipher the control of hepcidin expression employing network/systems-based analyses by integrating transcriptomic and proteomic analyses, mouse models and genome-wide siRNA screens.

Funding

Federal Ministry for education and research (BMBF)

German Research Foundation (DFG)

Dietmar Hopp Stiftung

Medical Faculty of Heidelberg

University of Heidelberg (Exzellenz Initiative)

European Community (6th Framework Programme)

Baden-Württemberg Stiftung

Translational Lung Research Center
