## NephroPharmacology Meeting 2017

October 21<sup>st</sup>, 2017

10:00 to 16:30

Heidelberg, Germany

## Invitation

We are pleased to invite you to participate in the 16<sup>th</sup> NephroPharmacology Meeting, which will be held in Heidelberg, Germany on October 21<sup>st</sup>, 2017.

NephroPharmacology is the intersection between clinical pharmacology and nephrology. The field is expanding because of the growing interest in pharmacokinetics, drug dose adjustment in patients with impaired renal function, renal replacement and intensive care therapy, immunosuppression and kidney transplantation, therapeutic drug monitoring, nephrotoxicity, drug therapy of co-morbidity, and of primary kidney diseases.

The 16<sup>th</sup> NephroPharmacology Meeting will be an excellent opportunity to discuss relevant changes in the field and present own research.

This year's topics will focus on

- PK-PD of immunosuppressive drugs
- Therapeutic drug monitoring in renal failure
- Drug dose adjustment
- Drug information systems
- Anticancer drugs and the kidney and related topics

We are looking forward to seeing you in Heidelberg!
